VEGETABLES - PROCESSING

ANNUAL SUMMARY

1968

CONTENTS

	<u>Page</u>
SUMMARIES:	
By crops	3 - 5
AGGREGATES BY STATES:	
Planted acreage	6
Harvested acreage	6
Production	7
Value	7
INDIVIDUAL CROPS:	
Asparagus	8 - 10
Beans, green lima	11
Beans, snap	12 - 13
Beets	14
Cabbage for sauerkraut	15
Corn, sweet	16 - 17
Cucumbers for pickles	18 - 19
Peas, green	20 - 21
Spinach	22 - 23
Tomatoes	24 - 25

"Effective January 1, 1969, the Statistical Reporting Service plans to discontinue calculation and publication of 5-year averages that appear in this report. The report will contain data for the current and the two preceding years. It is believed that changes in agriculture have decreased the value of the five-year averages for making comparisons."

VEGETABLES - PROCESSING

Annual Summary

1968

Production of the 10 principal vegetable crops grown in the United States in 1968 for commercial processing totaled 12,095,120 tons, the highest tonnage of record, according to the Crop Reporting Board. This is 21 percent above the record 1967 tonnage and 41 percent above the 1962-66 average. Production includes tonnage from mature acreage not harvested in a normal manner because of economic factors.

The 1968 tonnage of asparagus, beets, sweet corn, and tomatoes was up in 1968, more than offsetting small decreases for the other 6 processing crops. Increases for these crops are as follows: tomatoes, 34 percent; beets, 30 percent; sweet corn, 18 percent; and asparagus, 4 percent.

Yields per acre average above 1967 for asparagus, snap beans, beets, sweet corn, spinach, and tomatoes. Record high yields were estimated for sweet corn and tomatoes.

"Values per unit" from 1964 to 1968 for processing vegetable crops are not strictly comparable with prices reported for earlier years. Beginning in 1964, value of the crop is determined at the packinghouse door--i.e., the "value per unit" used to multiply by production is "equivalent returns at packinghouse door." Prior to 1964, the price was based on the average price at first receiving point. The value of all vegetables processed in 1968 totaled \$599,888,000, up 13 percent from a year earlier.

Data on the 5 leading States in acreage harvested, production, and value of vegetables grown for freezing and canning in 1968 are as follows:

LEADING PROCESSING VEGETABLE STATES IN 1968

Rank	Acreage harvested		Production		Value	
	State	Percent of U.S. total	State	Percent of U.S. total	State	Percent of U.S. total
1	Wisconsin	16.7	California	42.9	California	41.1
2	California	16.3	Wisconsin	8.4	Wisconsin	7.8
3	Minnesota	9.8	Minnesota	5.8	Washington	6.0
4	Washington	9.0	Ohio	5.6	Oregon	5.3
5	Illinois	6.2	Oregon	4.5	Ohio	4.3

This report is made possible through the cooperation of vegetable processors who provided basic statistics for their operations.
